

Fine to medium leaf texture with a deep green hue. **Stadium Zoysia** offers remarkable shade and drought resilience, along with excellent salt tolerance. Features an extensive system of stolon, rhizomes, and roots, with short stolon and internode lengths.

The turf spreads rapidly and has a density that is ideal for high-impact sports and golf course divot recovery. In simulated football wear tolerance trials at the University of Tennessee **Stadium Zoysia**, it demonstrated wear tolerance on par with Tifway 419. It also showed superior drought tolerance in replicated trials in Pleasanton, Texas; Lebanon, Oregon; Vietnam; and Thailand.

The recommended mowing height for **Stadium Zoysia** is 0.5-2 inches. For sports turf and golf course applications, it can be kept as low as 0.25 inches. Pre-emergence and all other post-emergence herbicides used for other zoysia grass varieties are safe for **Stadium Zoysia**. Once established, it requires less than 2 pounds of nitrogen per year, applied in divided doses.

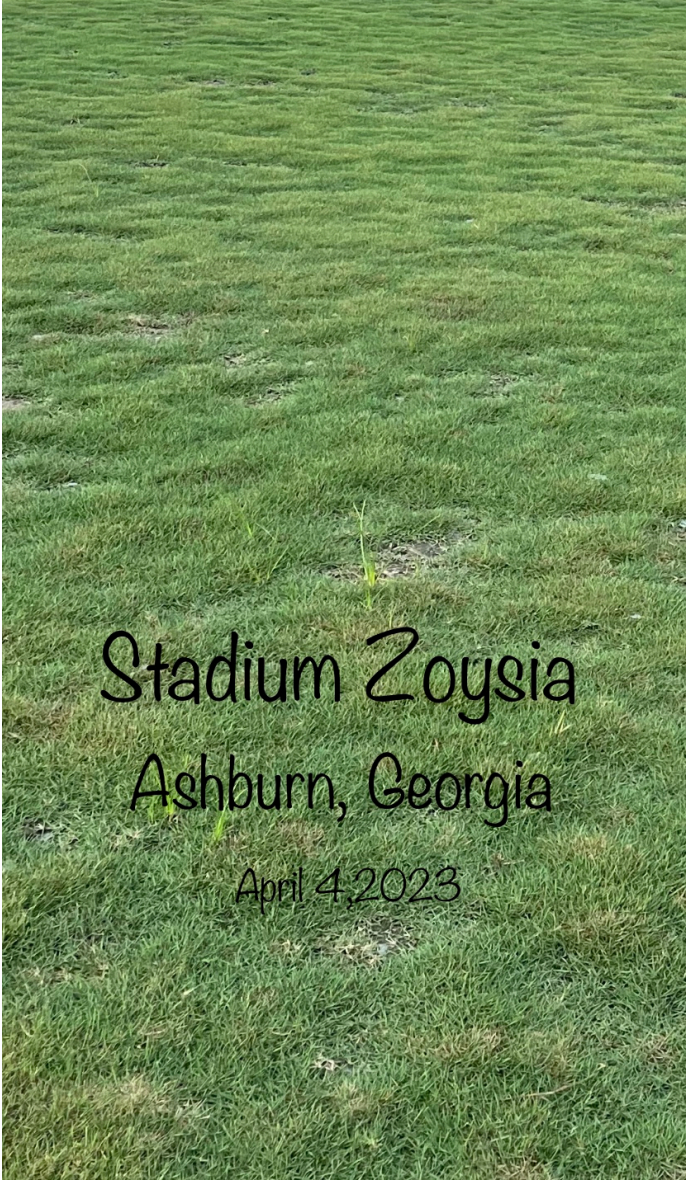

Certified Purity & Uniformity

- **Stadium Zoysia** is licensed in the Eastern U.S. exclusively to The Turfgrass Group, Inc. and its sub-licensees.
- **Stadium Zoysia** is available only through a select group of licensed certified producers.
- **Stadium Zoysia** is grown & sold under a rigorous set of rules & guidelines designed to promote on-going quality, purity, and uniformity.

State Certification

- Certification is the only method of assuring the consumer is receiving the variety they purchased.
- **Stadium Zoysia** can only be produced and sold as a Certified turfgrass variety, unlike many other varieties.
- Certification agencies in each state inspect all **Stadium Zoysia** production fields regularly, protecting the interests of the consumer by providing a third-party system of quality control
